OPEN HOUSE

FLOORING SOLUTIONS SHOWCASE

Advanced technology for parquet flooring

JULY 16th-17th

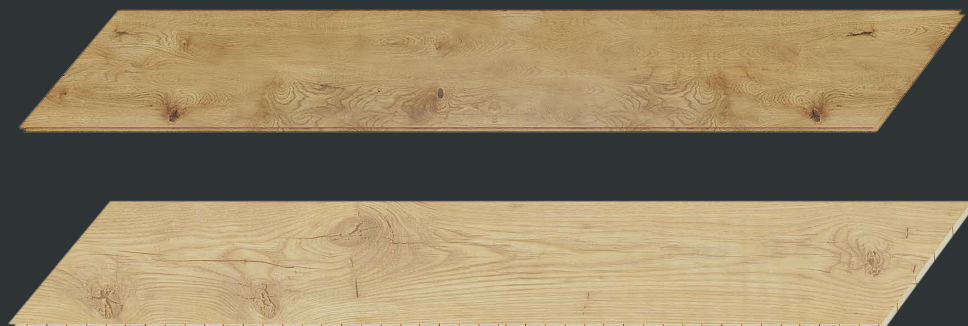

QUADRAMAT-C PDH

VERSATILITY AT ITS BEST

Engineered for high-precision end-matching at 90° or custom angles. The ideal solution for manufacturers seeking maximum profiling flexibility combined with millimetric accuracy.

QUADRAMAT FL

THE ENGINEERED PARQUET SPECIALIST

The definitive solution for longitudinal processing of engineered flooring. Designed to deliver high feed speeds and uncompromising structural stability for perfect long-side tongue and groove profiles.

RANDOMAT-E

VERSATILE END-MATCHING

A compact, versatile range of profiling machines for end-matching random-length parquet. Featuring innovative technology that enables precise profiling on both ends of any flooring element, regardless of length.

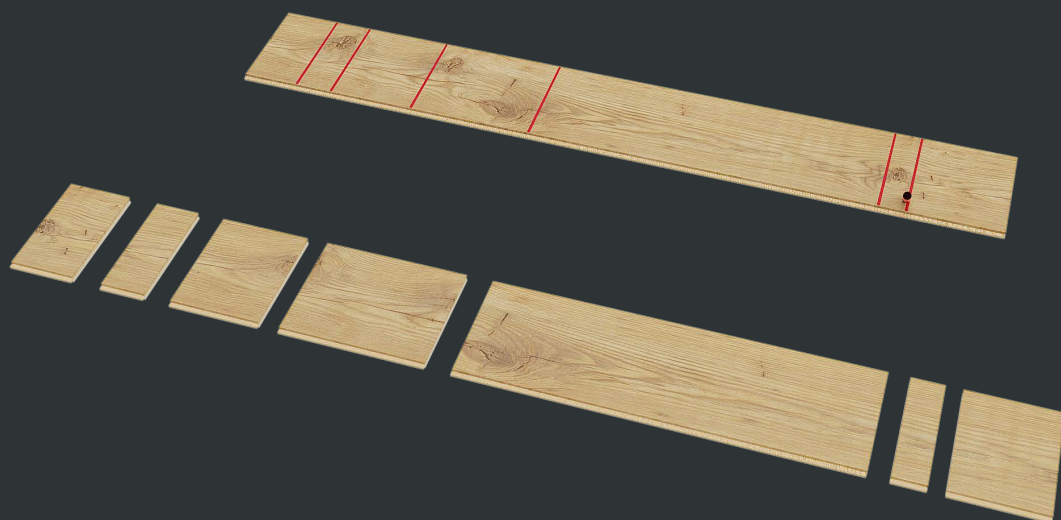

RANDOMAX-EVO

THE INTELLIGENCE BEHIND THE CUT

An advanced range of end-matching machines for fixed and random-length hardwood flooring, featuring advanced defect detection and cut optimization. Powered by integrated smart software, it maximizes yield and minimizes waste to ensure peak production efficiency.

INSIDE THE WORLD OF FRIULMAC

Our production facility in Italy: where engineering excellence and Italian craftsmanship combine to create the future of flooring technology.

TAILORED CONSULTING & LIVE DEMOS

During our Open House, you will have the unique opportunity to engage directly with our experts. We don't just show you machines; we analyze your specific production needs to develop customized solutions. Explore our digital integration and see firsthand how we can optimize your workflow for maximum efficiency and quality.

WE KNOW HOW

With sixty years of experience, **FRIULMAC** is a leader in **woodworking and advanced material processing**. Our production system is organized into dedicated divisions, each specializing in specific stages of the manufacturing process.

We understand that every customer has **unique needs**. Our team works **hand-in-hand** with you to develop **custom** solutions that optimize your entire production line, from start to finish—regardless of the material.

We don't just build machines; we build partnerships. We believe in **partnering** with our customers to **unlock their full manufacturing potential** across a wide range of industries.
